# **COLORADO COLLEGE CHAPEL** IS DEDICATED BY DR. BELL

Fine New Structure Most Beautiful In West; Honorary Degree Given Warden

At the dedication of the Shove® Memorial Chapel, heralded as the most beautiful structure of its kind in the west, at Colorado College on Tuesday, November 24. Dr. Bernard I. Bell, Warden of St. Stephen's College, delivered the two dedicatory addresses before a capacity gathering of 1,200 persons. At the official dedication morning service, he spoke on the subject of "The Quest for Reality," and his evening topic concerned "The Tragic Adven-During the first service ture." as the chapel was inaugurated in its academic aspects, Dr. Bell was awarded the honorary degree of Doctor of Laws by C. C. Mierow, President of Colorado College. He returned to St. Stephen's last Friday, a week ago today, after one week's absence.

The Dedicatory Address In his morning dedicatory address in the new Colorado College chapel, Dr. Bell, speaking on "The Quest of Reality", declared Distinguished Peace Promoter that religion is man's great guiding spirit and that the purposes of the chapel will bring more than learning to the students of that college, will bring them and the community more deep understand- December 7, one of the most dising, truer perceptions, that the truth may indeed make them Professor James Thomson Shotfree. He pointed out that colleges must protect and foster inner life. Carnegie Endowment for Inter-In part, he said, in opening:

and universities has ever been, and still is, the protecting and "Learning by Catastrophy", confostering of the inner life. From cerning the broad field of interthem the voices which can lead national affairs.

## PAN-HELLENIC DANCE

The Pan-Heilenic dance, scheduled formerly for tomorrow evening, December 5, has advisably been called off by the Council. It is now now planned that a supperdance will be held by the Pan-Hellenic Council in the Recreation and Faculty Rooms on some Saturday evening in January, following a home-scheduled basket-ball game.

- The basketball season at St. Stephen's College got under way officially yesterday, Thursday, evening when the St. Michael's quintet, of Winooski, Vt., downed the scarlet five 33-32 on the home floor of the latter.

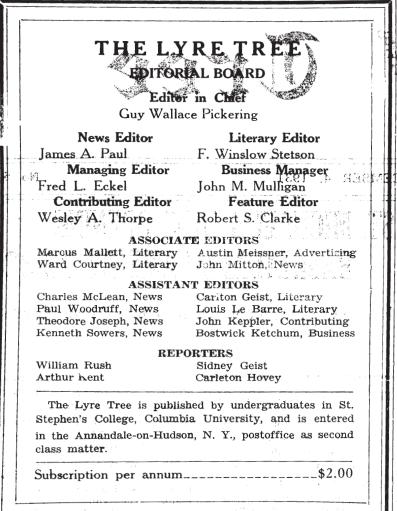

The game was a nip and tuck affair all the way through, the lead see-sawing from team to The game opened the team. season for both colleges and there was the raggedness in play on both sides that goes with early season play in any sport. There were, however, flashes of good play from time to time that rewarded those in the stands for attending and which showed both teams being capable of developing into powerful organizations. There were far too many fouls on both sides, Referee Banks, former athletic director at St. Stephen's, calling free shots on twenty-five offenses. Shooting on these was wild as the ball found its way through the basket only eleven times.

Burgevin, substitute St. Stephen's center, was the high scorer of the evening ,scoring four times from the floor for a total of eight points. Maynes and Keefe, of the visiting quintet, ranked next with seven points apiece. Billy Good was outstanding in his passing and his deception with the ball outwitted his opponent many times. Captain Gil Symons and Paul Woodruff

At half time, the St. Stephen's men had a lead of 17-16 which they increased when play started again. With five minutes to go the visitors were trailing by seven points but put on a speedy rally with which the scarlet team seemed unable to cope with. The lead dwindled and was in the

#### "THOU SHALL NOT"

Now that The Student Council has seen fit to pass laws concerning what the students shall wear to Commons we are faced with a dilemma. Ties must be worn at lunch and coats at dinner, but the question of paramount importance arises as to what the rest of the wearing apparel of the students must be. We suggest that a committee be appointed regulating the use of colored shirts, knickers, loud ties, unpressed trousers, etc.

Why the law should have been passed is another problem in abnormal psychology. No sooner does the administration pride itself on considering the students as intellectually responsible beings than it instigates the student governing body to pass a law which illustrates the negative. By far the majority wear ties and coats when necessary, as it is. Those few who don't are gentlemen just as much as those who do. If it were offensive to the faculty women the whole question might assume a different light, but they sit in an alcove from where, while eating, it requires acrobatic ability to detect those students who are gentlemen if they wear ties and are not if they don't. It is very queer.

Here again is our song. St. Stephen's men are different. St. Stephen's man does what he wishes as long as he doesn't harm the society to which he belongs. If a student hasn't wished in the past to follow the dictates of fashion there has been no roar of public opinion. The only conclusion that can be drawn is that the Student Council passed the law not because the students wished it but because some more powerful authority desired it. We are asked to excuse a professor if he hasn't prepared for a class on the grounds that we should be responsible enough to study for ourselves. If the students are to be reprimanded and fined because they might give a bad impression of the college we have a right to ask the same thing of the administration, for some of the faculty give just as bad an impression as some of the students.

#### "DEFACEMENT"

The editorial which appeared in this column some time ago and and Mrs. Edwards will entertain, his occupation. The bodies he

#### Dr. Obeshkove Makes **Biology Discoveries** $\epsilon_{in}$ High Voltage Krays Produce

Freaks; Aid Evolution Theory

Dr. Vasil Obreshkove, Professor of Biology on his sabatical leave this fall at Syracuse University, has recently reported some new and interesting findings in relation to the theory of evolution, the fiery fluid. Once\_twice\_we His work has been done with the dip into the delicious heat, and aid of Dr. King of Syracuse Chemistry Department. Freakish and seated flat upon the floorresults were obtained on a species The attendant stands behind us, of crustacean by bombarding them with high voltage X-rays. This work was started several gloves. He pounces upon an arm years ago by Dr. Muller of the University of Texas.

By bombarding the small crustacean creatures, water flees to give them a common name, a new individual has been obtatined. The mutations or changes produced in a few weeks by the and holding a basin alternately un-X-ray would take thousands and thousands of years to occur in floods us first with a fiery dash. nature. Unfortunately the new which creatures were not adopted to face shiver through every nerve. Then, the struggle for existance and with milder applications, he lessoon died, just as in nature we sens the temperature of the water have species becoming unsuited by semitones, until, from the to their environment and dying highest key of heat which we can out.

might appear in succeeding generations was tested. X-rays had rendered the creatures Others were tried but sterile. the results were all sterile individuals. In order to avoid this ture. obstacle, a new species was obtained which reproduced parthenogenetically. The results of working on this new species will a bunch of palm fibres. He squats not offer any definite conclusions down beside the bowl, and speediuntil later when more data may be secured.

The research has shed a great deal of light on the most fascinating theories of biology today, EVOLUTION. Apparently the X-rays hasten the processes of evolution. Just how the Xrays effect the body and germ pasm, the nature of their physiological actions, and the nature of changes in morphological structures are questions little understood as yet. With the advancement of work along the lines of Dr Muller, followed by Dr. Obreshkove and Dr. King, many of the problems in modern biology may be greatly clarified.

#### **Persian Baths** By JOHN NEESAN

(Continued From Lass Month) We are aroused from a reverse about nothing by dark, prown shape, who replaces the clogs, puts

his arm around our waist, and leads us into an inner hall within which is located a steaming tank. Here he slips us off the brink and we collapse over head and ears inare then led into a marble alcove we now perceive that his. and hands are encased in dark, hairy and he rubs it until, like a serpent, it sloughs the worn-out skin, and so on until our body resumes

its infantile smoothness and fairness. No man can be called clean until he has bathed in the East Now the attendant turns two faucets at the back of the alcove, der the cold and hot streams, sends a delicious warm bear, we glide rapturously down

The idea that the germ cells of the gamut until we reach the these queer individuals may have lowest degree of coolness. The been influenced by the short wave skin has by this time attained an rays so that the same deformities exquisite sensibility and answers to these changes of temperature It was with thrills of the purest physical found, unfortunately, that the pleasure. In fact, the whole frame seems purged of its earthy nature and transformed into something of a finer and more delicate tex

After a pause, the attendant makes his appearance with a large wooden bowl, a piece of soap, and Arizona. "A Bachelors' Club has ly creates a mass of snowy lather, which grows up to a pyramid and topples over the edge. Seizing us by the crown-tuft of hair upon our shaven head, he plants the foamy bunch of fibres full in our face. The world vanishes: sight, hearing smell, taste\_\_unless we open our mouth\_\_and breathing, are cut off; we become nebulous. Although our eyes are shut, we seem to see a blank whiteness. Twice we are thus slushed from head to

foot. Then the basin comes again into play, and once more we glide musically through the scale of temperature.

The brown sculptor has now nearly completed his task. The figure of clay which entered the bath is transformed into polished marble. He turns the body from side to side, and lifts the limbs to see whether the workmanship is Next Thursday evening, Decem- adequate to his exception. His

#### **Hockey Season Opens Following Christmas**

First Game on Home Rink With Massachusetts State Pucksters . .

This winter's hockey season is scheduled to start right after the Christmas vacation. when the team meets Massachusetts State on the St. Stephen's rink. The team has been generally getting into shape under the coaching of Mr. Leeke, who is also in charge of the basketball squad. The captain of this year's hockey sexted is Dick Nale, and the manager is definitely been scheduled, while the two openings now on the card are expected to be filled soon. The schedule now stands as folows:

Friday, January 8; Massachuetts State \_\_ at home.

Saturday, January 16; Army ---way

Tuesday, February 2; open.

Wednesday, February 3; Hamilon — away.

Thursday, February 11; open. Saturday, February 13; Union away.

Friday, February 19; Univ. of ermont --- at home.

Wednesday, February 24; Connecticut Aggies — at home.

#### **American Democracy** Invades Campus

The true spirit of American democracy is invading our Amer-ican campus in a new unusual way. Women have long demanded equal rights with men and now they must pay for them-on the campus of the University of been formed in this institution for the purpose of conducting a drive to make its co-eds share the expense of their all-necessary dates in order to bear through the depression together. It was estimated that the average college girl had more money to spend than the male. It seems that there is a danger that the "great American date" may lose much of unless this plan is its color adopted.

Arizona is not alone in this attempt to liquidate the "frozen date asset", for the divided payment plan is in operation at present at Annapolis, West Point, University of Pittsburgh, and several other large institutes.

After going into detail about life and truth, Dr. Bell most emphatically concluded his address with the following thought:

"It may be, under the guidance of the spirit of God, that in this house men and women may come into deeper and yet more deep understanding, truer and even more true perceptions, of reality; that truth may indeed make them free. Here may the spirit still 'Come. Let all who are say, athirst come, and let them drink the water of life freely.' Learning, though admirable, ennobling enlightening, is not enough for the making of a man. That which learning lacks, may this place in part contribute."

#### Honorary Degrees Given

As an introduction to the chapel in its academic features, Dr. Mierow awarded three honorary degrees: a Master of Fine Arts, honoris causa, to the architect, John Gray, and the degree of Doctor of Laws to the chapel's donor, Mr. Shove, and to Dr. Bell, the special speaker. In presenting the latter degree, Dr. Mierow said:

"I have the honor to present for the Degree of Doctor of Laws, honoris causa, Bernard Iddings Bell, minister, college executive and teacher of youth, interpreting for them the oracles of God, guiding their feet in the ways of righteousness, and inspiring them to nobler living and loftier service; a worthy inhabitant of the City of Letters, by precept and example leading men onward in the way of learning and of life."

Depression-and Why

Anyone who thinks the depression is a mythical reason for Dad to hold up on the allowance ought to take a look at the stock exchange sheet of a 1928 or 1929 paper and compare those prices with today's quotations. I happened to run across an April issue of the New York Times published in the year 1928, which I find most interesting. First of all, Allied Chemical and Dye was obtaining the peak price of 160, Adams Express, 298, and Ananconda, 65. Nowadays, Allied Chemical hangs low in the depths of impecuniousness at 86, Adams Express, instead of getting the fabulous bid of 298, now finds itself facing the stark reality of mark of 162 to its credit, but alas

General Motors struck 191 in the SECTION VII\_Cheer Leaders early part of 1928, that is, in There will be four cheer leaders

April, but now bows low to the inglorious price of 27. The only stock to have risen during the depression period seems to be Hershey Chocolate which has made the grade from 59 in 1928 to its present price, 83. Liggett and Myers which showed 117 in the 1928 newspaper now hides its head with 59. Radio Corporation of America standing at 169 in 1928

### PREACHING SCHEDULE

**College News** 

CHANGED

One change has become necessary in the preaching schedule for this year. That one is for a week from this coming Sunday, Decem-, ber 13 ,when Father Bell will preach in place of the Cannon of Hereford, A. L. Lilley, M. A. Paddock, Lecturer who was also to speak before the Dragon Club on the preceding evening on "Phil von Hugel". He has been suddenly called back to England and has been accordingly compelled to cancel all engagements, much to his regret, from December 8 on.

Thanksgiving Time was a pleasant one at St. Stephen's as it was 9, and Anaconda stands today at in the many homes of the under-18-quite a reduction from 65. We graduates.
