Annual Meeting Of Economic Society

World Economic Situation Reviewed

On Sunday, January 10th, a conversation group not experi- mentally in the Recreation Room. Dr. Bell, who acted as chairman, was very pleased with the result and he has been decided to continue the meetings of this information program with a different chairman each week.

There are seven or eight professors present. Each was asked to write the topic he would like discussed on a slip of paper. The slips were then drawn at random and distributed to the group. There was no attempt to prove a point or press an argument, merely a presentation of different point of view. This method of discussion has for some time been in practice in German universities, and it is adopted here as an interesting innovation.

The topic discussed were, "Economic system of study re- quireable for everybody," and "What is the future of the East?" All students and professors are invited to attend the next conversacon group in the Recreation Room on Sunday, January 17th at 4:30 p.m.

Dr. Belie Organizes Student Group

Next Meeting Sunday

On Sunday, January 10th, a conversation group not experimentally in the Recreation Room. Dr. Bell, who acted as chairman, was very pleased with the result and he has been decided to continue the meetings of this information program with a different chairman each week.

There are seven or eight professors present. Each was asked to write the topic he would like discussed on a slip of paper. The slips were then drawn at random and distributed to the group. There was no attempt to prove a point or press an argument, merely a presentation of different point of view. This method of discussion has for some time been in practice in German universities, and it is adopted here as an interesting innovation.

The topic discussed were, "Economic system of study re- quireable for everybody," and "What is the future of the East?" All students and professors are invited to attend the next conversacon group in the Recreation Room on Sunday, January 17th at 4:30 p.m.

Consider Dropping Hockey As Sport

The Athletic Committee has been reviewing the possibility of dropping Hockey as an Intercollegiate Sport. This year the entire question of the program was presented to the committee at the beginning of the current year and the committee recommended that Hockey be continued in the place of the Intercollegiate Sports.

Dr. Bell Explains College Situation To Convocation

On Thursday, January 13th, the Trustees of the College held a special meeting of the student body. The meeting was called as that which was held by the students last fall.

A major point of interest was the current financial situation of the College. The Trustees are currently reviewing the financial situation of the College and they have decided to continue with the current financial plan. The Trustees are also considering the possibility of increasing the student body to help cover the current financial needs of the College.

Varsity Squad Loses As Juniors Defeat Beacon High School

In mountain mine before the Varsity-East Stroudsburg game last Wednesday night, the Beacon High School defeated the St. Stephen's Junior Varsity Basketball team 63 to 52.

WHY HOCKEY?

For an institution of its size, we may well be proud of our athletic teams. The spirit behind our sports is widespread, and the results often astonishing. Nevertheless, we are hampered by lack of material. For, we find, to a large extent, the same men following the same sports. America may be charged with a lack of material, for here it is the individual, rather than the group, who is important. On the other hand, men or groups who are played at one time, the result is to weaken both of them.

Since hockey is more dependent on climatic conditions than any other sport, and too warm weather can ruin the season. An indoor rink and artificial ice are out of the question. All that is left is the hope of clear cold weather so that practices may be carried on. But we are situated far enough south to make such a hope an uncertain one. Hockey cannot be played unless a gas-driven moon. Here is the source of the ice, or an ice-making machine, or a gas-driven moon. There the players can practice under high pressure, and cold weather will not affect their form.

In conclusion, while we may say that the results of hockey are not as good as they might be, we can only say that the material and conditions are not as good as they might be. The team is certainly not without ability, and if it is given the chance, it will do well.
As a matter of fact its efficiency as a currency medium is less than it has been for many years past.

It was the general opinion that the Federal Reserve Banking System should be granted greater powers, and that the flexibility of its procedure should be increased. Directors of the Federal Reserve Banking System presided over a number of meetings, and so received at first hand, information as to what the leading economists of the country thought of their conduct of affairs during the past several years.

Dr. Edwards also attended the meeting of the American Sociological Society which was held in Washington at the same time as the Economic Association. One of the most interesting reports was that given by Professor Ogilby, a member of President Hoover's Commission on Retail Trade. Dr. Ogilby told of a machine, the so-called electric eye, which produced a typewritten manuscript at one end of the words spoken into the other. It is calculated that this machine will be commercialized inside of thirty years. That will mean the virtual extinction of stenographers. The "electric eye" will also read a book aloud when turned on specially prepared text. So in the happy future a student may have to become a bachelor of arts or even a doctor of philosophy without needing to learn to read and write.

President Bogardus of the American Sociological Society has just published a volume: "Contemporary Sociology". Dr. Edwards is one of the eighty academicians whose writings are quoted in controlling present day sociology.

---

COLLEGE SITUATION

(Continued from page one.)

The University will unite its best efforts with those of the St. Stephen's College to enable them to secure this celebrated capital sum to be raised, the Trustees of St. Stephen's College will make every endeavor to carry out the College in the past, testing to its annual deficit, all suggestions of those who understand the great importance of the project and who have faith in St. Stephen's. The Trustees of the University have the Springfield College's idea of the future, and the Trustees of St. Stephen's College is a part of the University's education. The chain of St. Stephen's College for adequate support is presented alike by the Trustees of the University and to the Trustees of the College, as a matter of grave and immediate importance, to all who are interested in advancing the cause of higher education in the United States. Noshick Murray Butler President of the University Bernard Judds Fell Warden of the College

EDUCATIONAL SYSTEM

(Continued from page one.)

The new educational system was adopted in the fall of 1927, and the new educational program was adopted in the fall of 1928. The new educational system is a project of the Trustees of St. Stephen's. The new educational program is a project of the Trustees of St. Stephen's College. The new educational program is a project of the Trustees of St. Stephen's College. The new educational program is a project of the Trustees of St. Stephen's College.

This is a brief, and very general, item of some of the most important educational tendencies in America. It signifies the fact that our educational system as the process of change. Only time can reveal and prove advantages. If our leading colleges will keep themselves open to criticism and maintain a progressive attitude, there should be no reason to fear that the summa bonus will not be realized. 

Men Of Public Life

SOCIALISM ADVOCATES: "Ready progress toward the equalization of income and the socialization of land, of public utilities, natural resources, principal industries, and banking. The administrative control of the government will be under directors representing the interest of the workers, the particular industry and the consumer."

Mr. Thomas said in pointing to the necessity of an adequate plan of socialization, "economic individualism has disappeared. The age of collective action is already upon us. The only question is what kind of collectivism, how managed, and for whose good?"
The House

(Continued From Page Two)

"Sure, I can't feel it either. After all, there's only one good thing about it. You get to be the boss. After all, you're the staff all night, and so be it, if you want it.

"Look, there's Tuff. Hello, kid, how's the match coming along?"

"Too early in the evening to tell."

Everyone laughs and Laughs. Ha ha ha. "I don't say anything about the feminine world."
