

Please proof this chapter closely for context.

There were so many questions resulting from too much or too little being scratched out that it would have taken forever to note all of them. Therefore, I noted only the more glaring questions and used my best judgement on the balance.

Questions noted in red pencil on draft;
light pencil check in left margin on typed
copy.

Ch. XIV

p1^{p2} li 9 (text p1) Is "affirmative" correct? (reading problem)

p2 li 9 (text p2) should "if" be deleted - to read:
"... determination -- the "

p3 li 7 (text p2) The sentence was left dangling.
I completed it with the word "way."
However, since the line immediately
above also says "different way",
perhaps a change to: "... is exercised
differently." would work better.

p3 P2 li 4 (text p2) see text for changes I made

p3 P2 last line (text 2) is "the channel" correct
(reading and/or spelling confusion)

p4 P3 li 5 (text p4) changed "understand" to
"understanding"

p9 li 12 (text 6) is the word: "stake"?

p. 9 footnote (text p6) is this an article (~~underline~~)
(use quotes), or a book (underscore).
Delete one or the other.

p11 P3 li 4 (text p8) ~~is~~ "great contraction"?

p11 P2 li 1-3 (text p8) Confusing sentence - did
I pick up too many words, or too few?

p14 li 5 (text p10) shouldn't there be another word
added such as: "... even as (it/they)
decreased the ..."

p. 16 P3 li 3+4 (text p14) Two sentences begin
with "But". One or the other, or both, "But"

should be ~~so~~ deleted.

p18 li 1+3 (text p. 15) Two sentences together begin with "However". Delete one or both? I would suggest not starting the paragraph with "However".
p. 29 #3 li 1 ^(text p. 27) ~~is~~ "1956-71, and 1968-72" correct, or should it be "1956-61"?

p30 li 3-2 from bottom (text p30) an incomplete sentence. This could be combined with next sentence by deleting the word "this" to read:

Social security legislation by setting a retirement age, as the act matured, reduced the number of older persons in the labor force.

p32 li 15-16 (text p. 32) "mainly" used twice in same sentence. Perhaps you'd like to substitute "primarily" for one of them.

N.B. | Page 34 of text is missing. P. 35 begins with continued sentence. Therefore, I have assumed 34 should be in. On that basis I left a numbered blank page (34) and continued with new # from text p. 35.

* p35 li 4 from bottom (text p36) When beginning a sentence with a number it should be written out. I did not change it, but could easily do so since it's at the end of a paragraph.

p. 36 ¶ 2 line 2 (text p36) "... near term..." ?

p38 ¶ 3 li 2 (text p38) shouldn't it say "12.8
million..." ?

p. 38 ¶ 3 li 6 (text p38) See * p. 35

p39 li 6 (text p38') As noted on draft, based
on the balance of the ~~st~~ paragraph
it would seem that "... are counted
as unemployed..." would be correct,
rather than "... as employed..."

p. 39 last line (text p38') where to close first quote
should it be instead "to suppose" ?

Or, "supposes... ^{to} believe".

p. 47 ¶ 3 li 3 up to this point, "Social Security"
has been written "social security" —
should be consistent upper case
or lower case.
